

Rebuilder

Phosphate Builder 0-17-0-12

Rebuilder is our regenerative phosphate builder for depleted soils. Bring life back to your soils with phosphate, sulfur and activated compost.

Renew. Revive. Replenish.

Replenish offers regenerative biofertilizers that build soil health and biology while providing superior, plant-available nutrients farmers rely upon for healthy crops. Farmers benefit from improved ROI and an alternative to conventional products that increase soil salts.

Benefits and Features

- ✓ Improve on-farm productivity with the ability to apply ahead of seeding or late in the season.
- ✓ Low salt load, helps to balance soil pH.
- ✓ Unlocks tied-up nutrients in the soil improving ROI.
- ✓ Rebuilds the soils organic matter by restoring soil biodiversity.
- ✓ Builds soil health through biological processes and timely release of nutrients.
- ✓ No leaching, contains mineral form of nutrients.
- ✓ Optimizes plant nutrient availability and uptake for improved plant growth.
- ✓ Rebuilder is ideal for conventional and sustainable crop programs.

Compositions

Contains trace amounts of micronutrients including boron, calcium, iron, copper, zinc, manganese, molybdenum, and magnesium to give added nutrition to soil microbes and balance soil pH.

Packaging

Bulk delivery or 1000 kg of blended fine product or granulated.

Phosphate Builder 0-17-0-12

Product Information

Guaranteed Minimum Analysis

Total Nitrogen (N) 0%
Total Phosphorus (P_2O_5) 17%
Potassium (K_2O) 0%
Sulphur (S) 12%

- ✓ Derived from natural sources of rock phosphate, sulphur, and proprietary active compost
- ✓ Inputs micronized to 150 μm
- ✓ Low salt formulation
- ✓ SGN 200-350
- ✓ Bulk Density (loose pour): 68 lbs/ ft³

Application Notes

- ✓ Rebuilder is suitable for spring and / or fall application.
- ✓ Can be applied alongside conventional fertilizer.
- ✓ Designed to be broadcast or seed-placed for ease of application.

Application Rates

- ✓ Annual application.
- ✓ Broadcast application: 200 lb/acre recommended.
- ✓ Refer to soil test analysis for specifics. Work with your sales rep or agronomist for customized recommendation.

Crop Support

Our team can help build you a custom, full- spectrum program for your growing needs.
